CM 9 AV

60 cm Electric multifunction built in oven

Avena design

Electric multifunction oven Class A (9 functions)

Analogue clock with minute minder

Cooling fan motor

Easy removable door

Double glass door

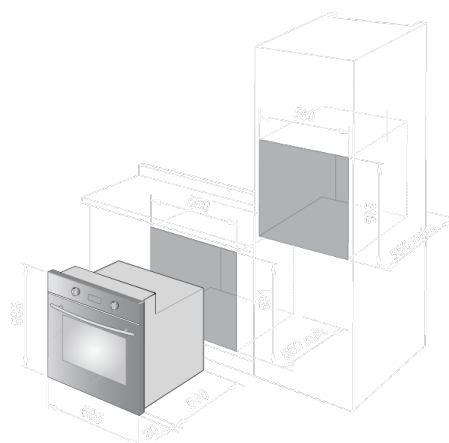

Easy clean enamel

Temperature controlled by thermostat

Safety thermostat

Accessories: 1 shelf, 1 space saver oven shelf, 1 tray

Dimensions: H. 594 mm x W. 594 mm

FEATURES

Energy rating

De'Longhi cookers have been designed with special care for low Energy consumption. Innovative technologies and insulations allowed Energy consumption performances among the lowest available in the market.

FULL GLASS DOOR

This innovative system allows better insulation, and a simple way for cleaning its wide smooth surfaces with the inner glass easily removable.

FORNO PRINCIPALE

OVEN LIGHT

The light within the cavity allows to see and check food cooking

TRADITIONAL COOKING

The heat coming from the top and bottom heating elements makes this function ideal for cooking pizzas, cakes, roast of any type and greasy meats like duck and goose.

GRILL

Ideal for browning and grilling food that needs high temperatures on surfaces like veal and beef steaks, filet, hamburger and all vegetables.

DEFROSTING

Using the fan function only spreads air uniformly and evenly throughout the cavity to defrost quickly frozen food.

FAN GRILL

Using the fan cooking function together with the grill makes grating and grilling faster, with a better heat distribution, leaving the surface of foods unburnt.

CONVENTION COOKING WITH FAN

Using the fan with top and bottom heating elements spreads heat uniformly inside the oven and is particularly suitable for foods demanding the same level of cooking both inside and outside, like rollroasts, legroasts and fishes, also set on different levels.

Resistenza suola

Il calore proveniente solo dal basso consente di rifinire le cotture che necessitano di una maggiore temperatura alla base. Indicata per completare la cottura di torte dolci o salate, pizze e crostate.

Resistenza cielo

Il calore proveniente solo dall'alto consente di completare le cotture di quei piatti che richiedono una leggera doratura superficiale. Ideale per rifinire la cottura di arrostiti e verdure.
